Clarification of Terminology and Cultural Values:

I imagine Unashamedly Ethical has refused to answer my questions because honestly answering my question would reveal that what they refer to as ‘ethics’ is not based upon Ecology of Peace root cause problem solving of social conflict; but Masonic War is Peace parasitic leeching pretend conflict solving; in order to deliberately socio-politically and economically profit from the misery resulting from avoiding root cause problem solving.

Sincere Problem Solving:

Sincere problem solving leadership only acts towards solving any problem to enable the problem to be clearly and succinctly defined; enabling the root cause of the problem to be exposed; so that the root cause of the problem can be removed. Put simply: If the bath of is overflowing; the problem solver points out that it is the tap that is not closed properly and is allowing too much water into the bath; beyond the bath’s carrying capacity.

Fake Pretend Problem Solving aka Parasite Leeching Fraudster Conmen:

Pretend problem solving parasite leeches generally choose some kind of ideology whereby they vaguely and ambiguously pretend to solve vague and abstract problems; while the predominant motive is to grow themselves a fan club/following, for their own socio-political or economic benefit. Their Parasite Leadership ‘problem solving’ deliberately avoids any focus on clearly defining any problem, or any investigation of the root cause of the problem. Their primary focus is to divert their fan clubs attention towards the symptoms of the problem, using emotional blame game language. In terms of the overflowing bath analogy: The bath is overflowing, Parasitical Leeching Leaders focus their fan club on endlessly mopping up the floor; who is mopping, who isn’t, what colour are their mops; who is mopping; who is not mopping; how are they mopping; where are they mopping; etc; etc. All attention towards defining the problem as the running tap is strictly avoided, in fact deliberately ignored; including vilifying anyone who even mentions the possibility of a tap leaking being the source of the problem. The focus is to perpetuate the overflowing bath problem indefinitely – irrespective of how much racial, religious or class conflict misery occurs; irrespective of how many broken homes, murders,

rapes, gang rapes; irrespective of the damage to the environment; extinction of species -- while socio-politically profiting from the misery; with endless new mopping ideas; which they know will not solve the problem; but enable them to perpetuate their problem for their own socio-political and economic profit.

“If you can't explain it simply, you don't understand it well enough.” - Albert Einstein

Put simply:

If they were sincerely interested in ethical root cause problem solving; they would inform their followers that:

1. Crime and corruption socio-political resource conflict problems – like economic inequality; psycho-social resource conflict conformity pressures; climate change, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, nation states standing army or dissident guerrilla army ‘terrorism’ resource war military aggression, Nazism, apartheid, racism, religious, racial and class conflict; etc – are a direct and indirect consequence of overpopulation and overconsumption.
2. Overconsumption and overpopulation are a direct consequence of humans procreating and consuming above ecological carrying capacity limits.
3. Humans procreate and consume above ecological carrying capacity limits because the current international law social contract; allows nation states to provide their citizens with the implied ‘right to breed and consume with total disregard for ecological carrying capacity limits’.
4. Individuals who are sincere about helping themselves, their families, their followers to ethically and honestly address their community or nations crime and corruption socio-political resource conflict problems – from economic inequality; psycho-social resource conflict conformity pressures; climate change, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, nation states standing army or dissident guerrilla army ‘terrorism’ resource war military aggression, to religious, racial and class conflict; etc – would clearly and simply inform them of Ecology of Peace Facts Reality:
5. Ecology of Peace Facts Reality being: (a) Earth is not flat; (b) Earth renewable and non-renewable resources are finite; (c) When humans [breed or](#)

consume above⁴ ecological carrying capacity limits⁵, it results in resource conflict⁶; (d) If humans want to peacefully coexist; sustainably protect and conserve natural resources for their own races, religions or other species survival posterity; and/or restrict national and international inter-cultural, racial and religious resource war conflict; they should cooperate with other humans with such goals; to reform and/or abolish the [Masonic War is Peace](#)⁷ international law social contract; and cooperate to implement an [Ecology of Peace](#)⁸ international law social contract that restricts all the worlds citizens, from all races, religions and classes; to breed and consume below ecological carrying capacity limits.

If they were sincerely interested in ethical root cause problem solving; but for some or other reason had not logically figured out the aforementioned Ecology of Peace Factual Reality ethical principles for peaceful religious and racial coexistence; if or when informed of the information; they would sincerely and ethically engage the individual to confirm the principles. If there were any errors in the principles; they would point out such errors. If there were no errors; and the theory was accurate and correct; they would provide their unequivocal cooperation.
